

Package ‘scatterpie’

April 3, 2024

Title Scatter Pie Plot

Version 0.2.2

Description Creates scatterpie plots, especially useful for plotting pies on a map.

Depends R (>= 4.1.0), ggplot2

Imports ggforce, rlang, gfun, stats, tidyverse, dplyr, utils

Suggests knitr, rmarkdown, prettydoc, maps, scales, cli

VignetteBuilder knitr

License Artistic-2.0

Encoding UTF-8

RoxygenNote 7.3.1

NeedsCompilation no

Index	5

`geom_scatterpie` *geom_scatterpie*

Description

scatter pie plot

Usage

```
geom_scatterpie(
  mapping = NULL,
  data,
  cols,
  pie_scale = 1,
  sorted_by_radius = FALSE,
  legend_name = "type",
  long_format = FALSE,
  donut_radius = NULL,
  bg_circle_radius = NULL,
  ...
)
```

Arguments

<code>mapping</code>	aes mapping
<code>data</code>	data
<code>cols</code>	cols the pie data
<code>pie_scale</code>	amount to scale the pie size if there is no radius mapping exists
<code>sorted_by_radius</code>	whether plotting large pie first
<code>legend_name</code>	name of fill legend
<code>long_format</code>	logical whether use long format of input data
<code>donut_radius</code>	numeric the radius of donut chart (relative the radius of circle), default is NULL. it should be between 0 and 1, if it is provided, the donut chart will be displayed instead of pie chart.
<code>bg_circle_radius</code>	numeric the radius of background circle, default is FALSE, we suggest setting it to between 1 and 1.5 .
<code>...</code>	additional parameters

Value

layer

Author(s)

Guangchuang Yu

Examples

```
library(ggplot2)
d <- data.frame(x=rnorm(5), y=rnorm(5))
d$A <- abs(rnorm(5, sd=1))
d$B <- abs(rnorm(5, sd=2))
d$C <- abs(rnorm(5, sd=3))
ggplot() + geom_scatterpie(aes(x=x, y=y), data=d, cols=c("A", "B", "C")) + coord_fixed()
d <- tidy::gather(d, key="letters", value="value", -x:-y)
ggplot() + geom_scatterpie(aes(x=x, y=y), data=d, cols="letters", long_format=TRUE) + coord_fixed()
p1 <- ggplot() +
  geom_scatterpie(
    mapping = aes(x=x, y=y), data=d, cols="letters",
    long_format=TRUE,
    donut_radius=.5
  ) +
  coord_fixed()
p1
p2 <- ggplot() +
  geom_scatterpie(
    mapping = aes(x=x, y=y), data=d, cols="letters",
    long_format=TRUE,
    donut_radius = .5,
    bg_circle_radius = 1.2
  ) +
  coord_fixed()
p2
```

`geom_scatterpie_legend`

geom_scatterpie_legend

Description

legend of scatterpie

Usage

```
geom_scatterpie_legend(
  radius,
  x,
  y,
  n = 5,
  breaks = NULL,
  labeller,
  label_position = "right",
```

```
  ...
)
```

Arguments

<code>radius</code>	radius vector
<code>x</code>	x position
<code>y</code>	y position
<code>n</code>	number of circle
<code>breaks</code>	A character vector of breaks, default is NULL.
<code>labeller</code>	function to label radius
<code>label_position</code>	a character string indicating the position of labels, "right" (default) or "left" or any abbreviation of these
<code>...</code>	other text arguments passed on to ggplot2::layer()

Value

`layer`

Author(s)

Guangchuang Yu

`recenter`

recenter

Description

re-center map data

Usage

```
recenter(mapdata, center, longitude_column = "long")
```

Arguments

<code>mapdata</code>	map data, shoud be a data.frame
<code>center</code>	center
<code>longitude_column</code>	longitude column

Value

updated map data
